My Requisitions

Requisition	Date	Memo to Suppliers	Internal Memo	Status
RQ00011263	09-11-2021	PO number must be shown in the invoice	<p>The purchase is required to ensure that our L&T activities across multiple electronic engineering courses can be continued without issues. The current license package was purchased 3 years ago with the option to have standalone student license (which can be installed in student PC and allows them to use the software outside of RMIT lab). This standalone student license option will expire this year and its renewal requires the renewal of the ASL package.</p> <p>It's worth noting that in this purchase, the license type is upgraded from non-concurrent to concurrent (which means that any PC within RMIT network can run Multisim). We also requested to increase the number of seats in the standalone student license option to 500 to ensure that we can meet our growing enrollment number in 3 Engineering programs (EE, RM, and SE) in the next 3 years.</p> <p>Net value: USD 19,467.75 FCT-CIT: USD 2,163.08 Total Value: USD 21,630.83</p>	Successfully Completed
RQ00005658	13-08-2021	The PO number must be shown in the red invoice	Purchase electric and electrical components for teaching and learning in 2021B	Successfully Completed
